

Vegetable Companion Planting Pairings Chart

Vegetable	Positive Relationships	Negative Relationships	Notes
Asparagus	Basil, parsley, tomato		Marigolds deter beetles
Basil	Asparagus, oregano, peppers, tomatoes,	sage	Repellent for mosquitoes, flies, thrips. Improves tomato flavour
Beans	carrots, celery, cole crops, corn, cucumbers, lettuce, onions, peas, potatoes, radish, squash family, swiss chard, strawberries	allium family, cabbage, chives, fennel, onions, peppers, sunflowers	Corn acts as a trellis, Beans add nitrogen to the soil, Marigold deters Mexican bean beetles, Nasturtium & Rosemary deter bean beetles, beets stunt growth
Beets	Bush beans, carrots, cole crops, corn, cucumbers, garlic, lettuce, peas, onions	beans, tomatoes	pole beans stunt beet growth, garlic improves flavour. Adds minerals to the soil.
Broad Beans	Broccoli, carrot, celery, corn, lettuce	Fennel, onions	Fixes nitrogen in the soil
Carrots	asparagus, allium family, beans, lettuce, parsley, peas, peppers, rosemary tomatoes	celery, coriander, dill, parsnip, potatoes,	onion, parsley & rosemary help deter carrot fly, chives improve growth, dill slows growth
Celery	beans, cole crops, dill, leeks, marjoram, peas, potatoes, spinach, tomato, cosmos, daisies, marigolds, nasturtiums, snapdragons	anise, dill, carrots, corn, parsley, potato, asters	asters may cause a disease called Aster Yellows, Chives & garlic deter aphids. Nasturtium deters bugs & aphids.
Cole Crops (Brussels Sprouts, Cabbage, Cauliflower, Kale, Kohlrabi)	beets, carrots, celery, dill, garlic, mint onions, parsnips, peas, rosemary, sage Nasturtiums help deter bugs	pole beans, onions, potatoes, tomatoes, strawberries	mint & rosemary deter cabbage moth Camomile, garlic improves flavor Thyme & mint helps deter cabbage moth
Corn	beans & peas & pumpkin cucumber, lettuce, marjoram, potatoes, sunflower, squash family	celery, tomato White Geranium helps deter Japanese beetle	beans + corn + pumpkin / squash = the 3 sisters that work together to fix nitrogen from the air & into the soil. Tomatoes & Corn are prey to the same worm
Cucumbers	beans, celery cole crops, corn, dill, lettuce, peas, radish	squash family, potatoes, heavily aromatic herbs like sage	potatoes & zucchini cause cucumbers to produce poorly. Oregano deters pests.

Gardening with Sharon

Vegetable	Positive Relationships	Negative Relationships	Notes
Leaf Crops	beans, beets, carrots, cole crops, leeks, mint, peas, peppers, radishes, strawberries, marigold	parsley	mint helps to repel slugs. Chives / garlic deter aphids
Marigolds	cole crops, cucumbers, lettuce, potatoes, squash family, tomatoes		beneficial for deterring many garden insect pests, beetles, and root crop damaging nematodes
Melons	Corn, pumpkin, radishes, squash		Marigolds deter beetles. Nasturtiums deter beetles & other bugs Marigolds - general bug protection
Onions	beets, carrots, cole crops, lettuce, parsnips, peppers, potatoes, tomato, rosemary, swiss chard, strawberry	asparagus, beans, peas, sage	camomile & summer savory improve flavour
Parsley	Asparagus, corn, tomatoes		
Peas	beans, beets, carrots, celery, cole crops, corn, cucumbers, lettuce, potatoes, radishes, squash, sage, turnips	allium family, onions, tomatoes	Garlic & Onions stunt pea growth Chives deter aphids. Mint improves health & flavour
Peppers	basil, carrots, coriander, eggplant, onions, spinach, tomatoes	beans, eggplant	share similar traits and pests – keep a distance from each other
Potatoes	basil, beans, celery, cole crops, corn, garlic, lettuce, onion, peas, spinach,	asparagus, carrots, cucumber, peppers, squash, tomatoes, raspberries, strawberries, sunflowers	Cucumbers, raspberries & tomatoes share similar pests – maintain a healthy distance from each other. Marigolds deter beetles. Horseradish provide protection
Pumpkins	Corn, beans, melon, squash	Oregano provides general pest protection	Marigolds & Nasturtium deter beetles
Radishes	Bean, carrot, cucumber, lettuce, melon, peas	Hyssop	Chervil & Nasturtium improve growth & flavour
Spinach	Cole crop, strawberries
